HELEN TAZREI

PRODUCT DESIGNER | B2B SaaS & FINTECH | UX/UI

Tehran, Iran | +98 910 425 1013 | Helen.tazrei@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Product Designer with end-to-end experience designing complex B2B SaaS and fintech products, a technical background in front-end development, and previous experience in product design leadership. My work spans compliance, exchange operations, multi-currency accounting, e-commerce and CRM, covering requirements and workflow analysis, UX/UI design, documentation, developer handoff and implementation review. I collaborate closely with product, engineering, QA, business stakeholders and users to translate complex business requirements into clear workflows and usable product solutions.

CORE EXPERTISE

Product Design: End-to-End Product Design · UX/UI · Interaction Design · Information Architecture · Complex Workflows · Design Systems

Discovery & Product Thinking: Requirements Discovery · Stakeholder Interviews · Workflow Analysis · User Research · Usability Evaluation · Competitive Analysis

Leadership & Delivery: Design Leadership · Hiring & Mentoring · Stakeholder Management · Agile/Scrum · Design Sprints · Cross-functional Collaboration · Design Handoff · Implementation Review

Tools & Technical Background: Figma · FigJam · Miro · AI-assisted Design Workflows (ChatGPT, Figma AI, Lovable) · HTML · CSS/SCSS · Front-end Development

PROFESSIONAL EXPERIENCE

Fintranet | United Kingdom · Remote — **Nov 2022 - Sep 2026**

Product Design Lead

B2B fintech company developing compliance, exchange operations and multi-currency accounting products for Money Service Businesses (MSBs).

Products: Fintranet · FintraAccount

- Own end-to-end product design across Fintranet and FintraAccount, with primary design ownership of FintraAccount's core capabilities and workflows.
- Designed FintraAccount's core service model to translate real-world exchange operations into automated accounting entries, alongside major workflows for bank-statement processing, money entities, organisation setup, multi-currency operations, financial reporting and year-end processes.
- Designed cross-product workflows connecting exchange orders in Fintranet to the corresponding accounting services in FintraAccount, reducing duplicate data entry, and designed integrations with ComplyAdvantage, SmartSearch and address-lookup services.
- Designed major Fintranet compliance and client-management experiences, including client onboarding, KYC/CDD, watchlist screening, risk assessment, client lifecycle and exchange-order workflows.
- Established and evolved product design practices within a development-led organisation, improving requirements definition, documentation, design handoff and implementation review within an Agile/Scrum delivery model; maintained and extended the shared design system as product needs evolved.

- Integrate AI into the design workflow for problem exploration, research, benchmarking, design critique, concept visualization and documentation, using tools such as ChatGPT, Figma AI and Lovable.
- Conducted weekly stakeholder sessions and recurring workflow-validation and usability-feedback sessions with operational users across two branches serving approximately 10,000 end customers.
- Hired and onboarded three designers and led a team of up to four members while remaining hands-on in product design.

DONO | California, USA · Remote · Part-time **Sep 2021 - 2023**

Product / UX/UI Designer

Digital gift card product for the U.S. market.

- Contributed to the 0-to-1 design and customer-facing launch of DONO, a digital gift-card product for the U.S. market, spanning consumer and business-facing experiences.
- Designed the consumer application, public website, business panel and corporate administration experience across web and mobile.

Rahkarpouya | Tehran, Iran **Apr 2021 - Sep 2022**

UX/UI Designer & Front-end Developer

- Designed web and mobile products across CRM, e-commerce, marketplace and management-dashboard projects for both B2B and B2C use cases.
- Translated requirements into user flows, wireframes and production-ready interfaces, and implemented selected designs using HTML, CSS and Bootstrap.

Freelance | Remote **2016 - 2021**

UX/UI Designer & Front-end Developer

- Designed and redesigned web and mobile products for startup and small-business clients, from requirements and information architecture through interface design and implementation.
- Built selected websites with WordPress and Wix and supported front-end implementation where required.

Collectia | Copenhagen, Denmark · Contract **2015 - 2016**

Front-end Developer

- Developed web-based application interfaces using HTML, CSS and Bootstrap, contributing reusable front-end components and interface patterns.

RT Consult Rådgivende Ingeniører ApS | Holsted, Denmark **2014 - 2015**

Front-end Developer

- Developed single-page web applications and reusable front-end components using HTML, CSS and Bootstrap.
